DRAFT

City of Florence
Public Arts Committee Work Plan
July 2023 – June 2025

Public Arts Committee (PAC) Overview:

The City of Florence Public Arts Committee was established in July 2015 in order to serve as the City's primary volunteer committee tasked with actively developing a Public Art Program and Policy for the City of Florence. PAC's mission is to integrate art into the daily life of our community and inspire extraordinary creative expression that will enrich public awareness and enhance the vitality, economy, and diversity of Florence through the arts. The art will not be limited to the area or its history, but would be at home anywhere in the world, not just on the Oregon Coast.

The committee's duties, as outlined in Florence City Code, include:

- Establish and maintain a city art collection
- Develop a map and list of desired locations and projects for future acquisitions
- Prepare for and secure funding for additional art works
- Consider projects by private developers and citizens that would result in public art

PUBLIC ART QUEST

PUBLIC ART QUEST

Dina Pavlis went on the Public Art Quest last week to make sure it still works with the new installation. She said it worked, with a few small changes to the wording of the quest.

The final version of the Florence Public Art Quest will be submitted to Oregon Quests very soon. Submit any final changes directly to Dina.

ART MAINTENANCE

Maple Street
Park

From Public Works Director Mike Miller:

The art piece had slipped again due to design flaw and the all-thread rod pulled through the silicone caulking that the artist recommended when it was repaired last time. The issue is that as the art piece spins/turns it travels down the all-thread rod, which cuts into the caulking. The single nut that supposed to keep the shape centered is not locked and also travels.

This time we are going to cover the all thread with a piece of PEX pipe and install washers to prevent it from traveling down the rod. As the artist mentioned in December, the newer models have a rod running through the middle of the wood panels, eliminating the metal thread which tears the black silicon. I believe the fix that my staff has/will complete will extend the life of the artwork, allow it to continue to spin, but not wear through the silicon or continue to move down the rod.
