

**City of Florence  
Public Arts Committee  
Regular Session**

Florence City Hall  
250 Hwy 101, Florence OR 97439  
541-997-3437  
[www.ci.florence.or.us](http://www.ci.florence.or.us)

- Meeting materials including information on each agenda item are published at least 24 hours prior to the meeting and can be found of the City of Florence website at [www.ci.florence.or.us](http://www.ci.florence.or.us).
- Items distributed during the meeting, meeting minutes, and a link to the meeting audio are posted to the City's website at [www.ci.florence.or.us](http://www.ci.florence.or.us) as soon as practicable after the meeting.
- To be notified of Public Arts Committee meetings via email, please visit the City's website at <https://www.ci.florence.or.us/newsletter/subscriptions>.

**November 25, 2024**

**AGENDA**

**4:00 p.m.**

**Members:**

Maggie Bagon, Chairperson

Marney Reed, Vice Chair

Dianna Allison

Serena Appel

Steve Ball

Carole Cohen

Peggy Meyer

Deb Ripley

Christine Diamond Santiago

Jo Beaudreau, Councilor Ex-Officio

Chantelle Meyer, Staff Ex-Officio

**The Public Arts Committee meeting will be held in person at Florence City Hall in the Council Chambers.**

Members of the public can listen and view the meeting through the 'GoToWebinar' platform at the following link:

<https://attendee.gotowebinar.com/register/3932277336283837280>

Citizens wishing to express their views may submit comments in writing or verbally. For more information, please see the end of this agenda or visit the City of Florence website at: <https://www.ci.florence.or.us/bc-pac/public-arts-committee-speakers-card>. With 48-hour prior notice, an interpreter and/or TTY: 541-997-3437, can be provided for the hearing impaired. The meeting is wheelchair accessible.

**1. CALL TO ORDER — ROLL CALL**

**2. PUBLIC COMMENTS — Items not on the agenda**

This is an opportunity for members of the audience to bring to the committee's attention any item not otherwise listed on the agenda. See Page 2 of this agenda for more information.

**3. 2025 CALENDAR REVIEW**

Consider adopting the proposed 2025 Calendar for the Public Arts Committee

**4. ART EXPOSED OLD TOWN 2025-2027 — Initial review of submissions**

Staff will go over each of the eight Art Exposed locations in Old Town, <https://bit.ly/FlorenceArtExposed>, and the requirements for each. Then, the Art Exposed Subcommittee and Staff will give an update on the 25 applications we received from our Call for Art, which was hosted on <https://callforentry.org/>. This is an opportunity for the committee to discuss the applications, and go over next steps in the selection process.

**5. SUBCOMMITTEES — Updates on Art Exposed, Public/Private Partnerships, and Inventory & Maintenance**

**6. STAFF REPORT — Next Meeting Dates**

**7. CHAIR & MEMBER REPORTS — News on Arts & Culture Related Activities**

## TENTATIVE MEETING CALENDAR

PAC Meetings are held on one Monday a month. Meetings are held in-person with the option to view or attend virtually.

Date	Time	Description
December 16, 2024	5:30 p.m.	Public Arts Committee Meeting
January 2025 — Date TBD	4 p.m.	Public Arts Committee Meeting
February 2025 — Date TBD	4 p.m.	Public Arts Committee Meeting
February 2025	TBD	Installation of Art Exposed Old Town

The Public Arts Committee meeting will be held in-person with the option to attend virtually via GoToWebinar

<https://attendee.gotowebinar.com/register/3932277336283837280>

**Expressing Views to the Committee:** Citizens wishing to express their views may do so in both written and verbal formats.

1. **Written Testimony:** Citizens wishing to express their views to the Committee are encouraged to submit written testimony in one of the following ways:
  - a. Submit written comments via email to Chantelle Meyer, Economic Development & Communications Analyst, at [chantelle.meyer@ci.florence.or.us](mailto:chantelle.meyer@ci.florence.or.us)
  - b. Mail written comments to Florence City Hall, Attn: Public Arts Committee, 250 Highway 101, Florence, OR 97439
  - c. Drop off written comments at Florence City Hall (250 Highway 101) during regular office hours (Monday through Friday 8 a.m. – 4 p.m.) or at the City of Florence drop box located at Florence City Hall to the right of the main entrance.
- Note:** Written comments received at least 2 hours prior to the meeting will be distributed to the Committee, posted to the City of Florence website, and made part of the record.
2. **Verbal Testimony:** Citizens wishing to express their views to the Committee may participate in the meeting in-person or via GoToWebinar. To do so, please complete a speaker's card online at <https://www.ci.florence.or.us/bc-pac/public-arts-committee-speakers-card> at least 1 hour prior to the meeting. City staff will then contact the speaker to let them know the process to participate in the meeting.
  - a. Public Comments on items not on the agenda: General public comments (on items not on the agenda) will be allowed at each Committee meeting during the public comment agenda item. Comments will be limited to three (3) minutes per person, with a maximum of 15 minutes for all items. In practicality, this means no more than five individuals will be allowed to comment verbally. There is no limit on written public comments.
  - b. Public Comments on Action Items: Public Comments will be allowed on each action item on the Committee agenda. Verbal comments will be allowed on action items after staff has given their report and have allowed time for initial Committee questions. Comments will be limited to three (3) minutes per person, with a maximum of 15 minutes for all comments on each action item. In practicality, this means no more than five (5) individuals will be allowed to comment verbally. There is no limit on written public comments.

### Mission of the Florence Public Arts Committee:

To integrate art into the daily life of our community; Inspire extraordinary creative expression that will enrich public awareness; and Enhance the vitality, economy, and diversity of Florence through the arts.

**Experience Florence**  
WHERE EVERY DAY IS A CELEBRATION OF THE ARTS

City of Florence  
Public Arts Committee Memo  
November 25, 2024

Dear Public Arts Committee members,

I'm excited to see you this Monday, November 25, 2024, for our regular monthly meeting at 4 p.m. at Florence City Hall. We will be meeting in the City Council Chambers, either in person or through the GoToWebinar platform. As a reminder, our December meeting will be held at 5:30 p.m. to allow for community involvement.

The meeting will begin with public comment. However, due to our heavy workload during the meeting, we are skipping our Continuing Education presentation. Staff will next present the proposed 2025 Public Arts Committee Calendar; this will be dependent on the Florence City Council approving their calendar on November 18.

The majority of the meeting will be to talk about **Art Exposed Old Town 2025-2027**, <https://bit.ly/FlorenceArtExposed>. Our Call for Art on Call for Entry (CaFÉ) concluded on Friday, November 8. We received 25 submissions for the eight locations in Historic Old Town Florence. Members of the Art Exposed Subcommittee met twice in November to get acquainted with the submissions and review the location descriptions in the Call for Art.

Inside this packet, please review the following materials before our meeting:

- Art Exposed Old Town Timeline
- Art Exposed Old Town Location Descriptions
- Art Exposed Old Town Submissions — photos, artist statement, artwork dimensions and descriptions
  - Subcommittee Suggested Location Chart & Blank Location Chart for your own notes
  - Art Exposed Evaluation Rubric

Since we have 25 sculptures to go through, be prepared to discuss your favorites and consider finalists for each location. Additionally, members of the audience will have the option to give public comment as we discuss.

We will make our final decisions at our December 16, 2024, meeting at 5:30 p.m. Public engagement is welcome throughout the process.

I look forward to seeing you in person at Florence City Hall on November 25, or through our online platform GoToWebinar. If you have any questions or concerns, please reach out to City of Florence Economic Development & Communications Analyst Chantelle Meyer at [chantelle.meyer@ci.florence.or.us](mailto:chantelle.meyer@ci.florence.or.us).

Meeting information and materials are available now at <https://www.ci.florence.or.us/bc-pac/public-arts-committee-meeting-26>.

## In this Packet:

- Proposed Public Arts Committee 2025 Calendar
- Public Comment received as of November 18, 2024
- Art Exposed Materials

# Public Arts Committee

## Public Comment Sent to Florence City Council on November 1, 2024

**Sent:** Friday, November 1, 2024 1:33:02 PM

**Subject:** Rhododendron Dr work

### **Topic Rhododendron Dr work**

I was very happy and excited to attend the grand re-opening of Rhododendron Drive this morning. A HUGE congratulations to EVERYONE involved in the expeditious re-opening of our street, and all the added amenities it brings. Thank you to all for making this happen, and K&E Excavating did a fantastic job of always keeping the needs of the residents of Marine Manor front of mind.

As a member of the Public Arts Committee for the city, I would be remiss if I did not make an appeal for the need of some sort of public artwork to be added to the retaining wall between Wild Winds and Marine Manor. There is not a more perfect opportunity (or canvas) than this wall to celebrate and promote the arts for all who drive, walk, bike and boat by this area. I truly hope the city makes it a priority to add either a mural or some sculptural element soon, before the possibility of unsightly additions get added by someone without artistic abilities. I'm sure I speak for others in the group when I say the Public Arts Committee stands ready to assist with the effort!

Again, congratulations to all on a job TRULY well done. I am proud to be a resident of Florence today, and every day!

Contact Information:

First Name Steve

Last Name Ball

November 18, 2024

Dina Pavlis  
Florence, OR 97439

Good evening, everyone. Thank you for allowing me to speak.

My comments tonight are in regard to the Rhododendron Drive Realignment Project that was completed at the end of October.

I would like to say "thank you" to everyone involved in this project. The City and all staff did a first-rate job of communicating...from way before the project began. all the way through to the end. The contractor did a wonderful job of managing traffic flow, addressing issues, and finished early. It could not have been a better outcome for our city.

I've driven, walked and pedaled through the area. It is a wonderful addition to our city, providing better and safer access to an area cherished by those who live and visit here.

I hope, as we move ahead, the City, City Council & Public Art Committee will consider...

1) A possible art installation on the wall to further enhance the area.

and

2) New and additional bike paths for our city. Providing beautiful and safe locations to ride has great potential, including: Tapping into a potentially large unrealized tourism resource for Florence and, enhancing the safety, quality of life, and health of those who live here.

Thank you for your time.

To: The City of Florence Public Arts Committee

From: Britte Kirsch - 90090 Ben Bunch Road, Florence OR 97439

Re: Audubon Mural Project Opportunity / Washed Ashore Plastic Recycled Sculpture

Date: November 19, 2024

I attended the November 18, 2025 City Council Meeting and was very excited to hear that both Dina Pavlis and Committee Member Steve Ball commented on the wonderful new Rhododendron Drive project. And I was also excited to hear both of them suggest some sort of amazing artwork for the huge canvas aka retaining wall. I know there are many options and hoops to jump through to get some sort of city mural project underway, so I just want to suggest (again) considering an Audubon bird inspired mural. I know it takes a village to make something like this happen and there are many creative options to consider.

Steve also suggested some sculptures possibly? Several years back when the remodel of the new Transfer Station finally finished, Kelly Bell, Lane County Waste Management Master Recycler Coordinator, had some wonderful ideas about putting a Washed Ashore (recycled plastic) sculpture at the entrance to the new site. Here is a link to some of the sculptures that they have created over the years - <https://www.washedashore.org/galleries/>.

Washed Ashore has a traveling exhibit program as well as a "retired sculpture" program. Here is a link to more information - <https://en1.0f5.myftpupload.com/exhibit-locations/>. They also have some educational and art based curriculum that could be a component of your work plan community engagement goals.

I would be more than happy to reach out to Washed Ashore and Kelly Bell to get more information and project ideas and details - if there is any interest.

Thank you so much for considering the Audubon Mural Project and maybe a future Recycled Plastic sculpture for the Transfer Station! Also thank you to Steve Ball and Dina Pavlis for being proactively creative about the possibilities and starting the conversation with City Officials!

Warm Regards

Britte Kirsch

## Location Information

### **Location #1 – Veterans Memorial Park**

This location is at the City of Florence’s Veterans Memorial Park alongside the Siuslaw River. The park provides an opportunity for the public to view the piece during special veteran and community events, as well as every day. The piece will be close to lodging and foot traffic in town and the location overlooks the picturesque Siuslaw River Bridge. ***The art chosen for this location will be given preference to an American military veteran, or art that honors American veterans.*** The base at this location is approximately 2 feet tall.

#### **Maximum Dimension Requirements:**

Height: No more than 8 feet tall

Width: Cannot exceed 5 feet wide

### **Location #2 – River Roasters**

This location is on the west end of Bay Street, the main street of Old Town commerce. The base for this location is located approximately 2 feet west of the end of the River Roasters coffee shop patio, near native landscaping and seasonal flowers. This is a high-traffic location in a busy part of Old Town, where people walk to restaurants and shops. This spot is a vista point for the Siuslaw River Bridge, visible from the installation spot at the local Rain Garden and Interpretive Site.

#### **Maximum Dimension Requirements:**

Height: No more than 4 feet tall

Width: Cannot exceed 3 feet at the base

### **Location #3 – Rain Garden**

This show-stopping location is set in the middle of the Rain Garden between Bay Street and the Siuslaw River. The art pedestal has been built into the native landscaping to be the same height as the nearby walkway. This allows the selected art to frame the historic, art deco Siuslaw River Bridge in the background and work with the natural colors of the seasonal Rain Garden. This location is near both Location #2 and #4, and a walkway and sidewalk connects them all.

#### **Maximum Dimension Requirements:**

Height: No more than 10 feet tall

Width: Cannot exceed 5 feet at the base

**Location #4 – Interpretive Center East**

Location #4 is on the eastern side of the Siuslaw River Interpretive Center. This space is in front of pine trees and near the City of Florence’s holiday tree, which is decorated each December. Two walkways frame this installation area, which has nearly 360-degree visibility. Nearby trees are trimmed to expose art at this location. Many people walk past this location every day to view the Siuslaw River Bridge or visit popular neighboring restaurants and shops in the Old Town District.

**Maximum Dimension Requirements:**

Height: No more than 7 feet tall      Width: Cannot exceed 3 feet at the base

**Location #5 – Gazebo Park Plaza**

Gazebo Park, also known as Old Town Park, offers views of both the City’s vintage white gazebo and the Siuslaw River. This art location is at the entrance to Gazebo Park near brickwork and behind a railing in front of trees and native shrubbery. This work is mainly seen from the front of the shaded plaza area. Visitors often take time to sit on the benches located right under this piece. It is located in the middle of the highly trafficked main street in Old Town.

**Maximum Dimension Requirements:**

Height: No more than 7 feet tall      Width: Cannot exceed 3 feet at the base

**Location #6 – Secret Garden**

Tucked into the native landscaping inside Gazebo Park, this location is in a raised planter bed along a brick pathway. This leads to the gazebo and a deck overlooking both the Siuslaw River Bridge and a historic ferry landing. The selected work will be framed by two different walkways that intersect, allowing views from both the front and the back of the art. The installation area is mostly shaded and contains shrubs and native rhododendrons alongside an open, grassy area and a slate paver pathway.

**Maximum Dimension Requirements:**

Height: No more than 4 feet tall      Width: Cannot exceed 3 feet at the base

**Location #7 – Maple Street Park**

This location is at the entrance of Old Town’s Maple Street Park, which contains local restrooms and access to the Port of Siuslaw’s crabbing and fishing docks. This high-traffic area, right along the sidewalk of Bay Street, is at a busy intersection where people access restaurants, shops, and the local Florence Farmers Market. This paved mini park has benches, a maple tree that branches over the park area, and trees and rhododendrons that provide a colorful, seasonal backdrop for the many visitors.

**Maximum Dimension Requirements:**

Height: No more than 6 feet tall      Width: Cannot exceed 3 feet at the base

**Location #8 – Florence Area Chamber of Commerce Lawn Entrance**

In the grassy lawn of the Florence Area Chamber of Commerce’s Visitor Center on Maple Street, this location welcomes visitors to the Old Town District. It is also near the City of Florence’s recently completed multi-million-dollar streetscape project that expanded sidewalks, repaved the highway, and increased walkability. This location is near the entrance to a public parking lot and the busy Visitor Center. Just north of the placement of this work is the Maple Street Plaza, another Art Exposed location.

**Maximum Dimension Requirements:**

Height: No more than 10 feet tall      Width: Cannot exceed 3 feet at the base

## “Genesis”

### Artist Statement:

As an artist It’s important to me to have my work be part of the visual conversation art creates in our public and private spaces. My desire is to create meaningful, thoughtful work that tells a story. Exploring the effects of life’s unpredictable events, the healing impact of the natural beauty around me, and the resulting decision I make moving forward motivate me in my work. What causes us to move from hardship toward optimism is a subject that I personally think about. These themes tend to find expression in my work.

I have been working with Stainless Steel and glass for over 20 years. I have been participating in Rotating Outdoor Galleries for 15 years. My sculptures employ stainless steel, copper, bronze, and kiln worked glass. I enjoy the undeniable parallel between real life and the process these materials undergo as they are subjected to extreme heat, to be transformed into something full of beauty.

### Art Title: “Genesis”

**Date Created:** 2016

**Description:** “Genesis” links the ancient the creation story with our compulsion to create, explore, and look beyond the stars.

**Medium:** Stainless Steel, Hand-painted Cast Glass, Copper Leaf, Automotive Clear Coat

**Dimensions:** 96 inches (8 feet) by 30 inches, Base is 36x36 inches

**Weight:** 150 pounds

**Listed Price (City takes 30% commission):** \$15,000

**Artist Website:** [sharonagnor.com](http://sharonagnor.com)

# Artist B – Ann Cavanaugh

## “Musing Arcs”

---

### Artist Statement:

Cavanaugh Fused Glass is a mother/daughter team that focuses on artwork inspired by nature. We create statements out of glass that celebrate flora and fauna. Our pieces are designed to exist out in the environment. We've chosen glass as our medium because of the way light transforms it and for its durability. The glass we make reflects the textures and colors of the natural world. Not only valued as a utilitarian material, glass is now celebrated as a contemporary fine art, encompassing superior qualities of clarity, transparency, and luminescence.

Ann Cavanaugh grew up roaming and “making” in the outdoors of Oregon. Early exposure to formal art instruction and lots of room for experimentation has culminated in being a maker of glass for 47 years. Her work can be seen in galleries and private residencies as well as in public spaces such as libraries, hospitals and parks.

Megan Andrews was raised in much the same free roaming way as my mom. She received formal art training in San Francisco. She came back to the Pacific Northwest with family in tow to passionately dive into glass making side by side with her mom. She has implemented a “no waste/reduced footprint” policy and standard for all their projects and classes. Much of her work embodies utilizing recycled studio materials. One of her recent large-scale projects was a large fence commission created out of recycled studio glass.

### Art Title: “Musing Arcs”

**Date Created:** 2023-2024

**Description:** Half circle standing sculptures capturing thoughtful moments.

**Medium:** Repurposed glass on edge is fused into a panel, which are further embellished and fused again. Once final design is achieved, they are draped and fused over a metal form. They are then cold worked and finished, then fitted to a metal base.

**Dimensions:** 24 to 36 inches, Base at 13 inches

**Listed Price (City takes 30% commission):** \$3,120

**Weight:** 25 pounds

**Artist Website:** [anncavanaugh.com](http://anncavanaugh.com)

She came back to the Pacific Northwest with family in tow to passionately dive into glass making side by side with her mom. She has implemented a “no waste/reduced footprint” policy and standard for all their projects and classes. Much of her work embodies utilizing recycled studio materials. One of her recent large-scale projects was a large fence commission created out of recycled studio glass.

### Art Title: “Story Poles”

**Date Created:** 2023-2024

**Description:** Story Poles are four sided weather treated posts with fused glass panels attached. Each one tells the tale of our relationship with nature. These poles can include solar lighting or bird houses as toppers.

**Medium:** Painted, pressure-treated 4x4s, glass panels (fused or casted), commercially made solar lighting, hand crafted bird houses, metal toppers. These are then attached to a pole that can be screwed into cement

**Dimensions:** 36, 48, 60 inches, Base at 13 inches

**Weight:** 12 pounds

**Listed Price (City takes 30% commission):** \$2,730

# Artist D – Dale Compton

## “Move Along”

### Artist Statement:

I have been creating artwork since the late '90s and have been creating public art since 2020. I have many years experience working with metal sculptures.

Born and raised in Minnesota, I have always been drawn to art. As a high school student I spent my summers working in a custom framing gallery. This was my first true exposure to a wide variety of art. I received my B.S. degree in Art Education from Minnesota State University, Mankato and taught high school art for the past 20+ years before recently moving to the Pacific Northwest. I have been fortunate to have sculptures on display in cities throughout the Midwest over the past few years and am always excited to visit new cities and share my sculptures with the local communities.

As an avid outdoor enthusiast I always have my camera with me. I look to find interesting photos wherever I travel. It is in my photos and scenes from nature that inspire my sculptures. From the geometric forms to the abstractions found outdoors I look to bring those into my artwork. With a focus on recycled materials and salvaged or reclaimed metal, I aim to help keep the natural environment a place of beauty.

### Art Title: “Move Along”

**Date Created:** 2024

**Description:** What is the key to happiness? Some might say it is something as simple as movement. When we are sad or tired we tend to move slower. But if we are excited our pace picks up. This sculpture incorporates two types of movement. This first is the visual movement of the different sizes of rectangles leading the viewer to move visually from one section to the sculpture to the next. The second part is the actual movement of the center pieces within each rectangle. Feel free to give them a spin. As you move along from this piece I hope you leave with an extra hop in your step!

**Medium:** This piece uses reclaimed metal to create the form. I welded the 2"x2" steel tubes together as well as the 1/4" steel rods in the centers. The metal base, created with 1/8" sheets, is reinforced with angle iron running horizontally underneath to add stability to the sculpture. I have added metal tabs to the base with holes in the tabs for ease of installation (either by welding the tabs to the city provided base or by bolting down to the base). This piece has been coated with a clear protective coating to prepare it to withstand the elements.

**Dimensions:** 71 inches by 18 inches

**Listed Price (City takes 30% commission):**

**Weight:** 110 pounds

\$5,800

## “Cosmic Flower”

---

**Artist Statement:**

I have been working with reclaimed steel for 20 years. I got my experience in commercial metal fabrication.

I love finding different ways to use scrap metal in my sculptures so that it can tell its first story of what it once was and then its new story of what it is. It's giving scrap metal a second chance. My goal is to inspire the community to create, interact and see the potential in “throw away” material.

**Art Title: “Cosmic Flower”**

**Date Created:** 2024

**Description:** Cosmic Flower is a mixture of metal textures. She features intricate layers and patterns to evoke the beauty of a flower blooming in a cosmic landscape.

**Medium:** Solid rod, Angle iron, Ball bearings, Copper, Brass. All steel has been welded, the copper has been sandwiched with welded steel and the brass has been captured with steel.

**Dimensions:** 67 inches (5.5 feet) by 32 inches

**Weight:** 100 pounds

**Listed Price (City takes 30% commission):** \$6,800

**Artist Website:** [www.fairyforge.com](http://www.fairyforge.com)

# Artist F – Jenny Ellsworth

## “Growing Love”

### Artist Statement:

I have been working with reclaimed steel for 20 years. I got my experience in commercial metal fabrication.

I love finding different ways to use scrap metal in my sculptures so that it can tell its first story of what it once was and then its new story of what it is. It’s giving scrap metal a second chance. My goal is to inspire the community to create, interact and see the potential in “throw away” material.

### Art Title: “Growing Love”

**Date Created:** 2024

**Description:** “Growing Love” is a captivating series of five interwoven hearts, each symbolizing a deepening connection and unity. The hearts, intertwined with one another, represent the growth and evolution of love over time. This artwork evokes feelings of warmth, intimacy, and the beauty of relationships as they flourish and intertwine.

**Medium:** Tractor disc for the base, round tubing for the stems, solid rod for the hearts all welded together

**Dimensions:** 87 inches (7.25 feet) by 32 inches

**Weight:** 100 pounds

**Listed Price (City takes 30% commission):** \$6,000

## “Resonance”

---

**Artist Statement:**

I have been working with reclaimed steel for 20 years. I got my experience in commercial metal fabrication.

I love finding different ways to use scrap metal in my sculptures so that it can tell its first story of what it once was and then its new story of what it is. It's giving scrap metal a second chance. My goal is to inspire the community to create, interact and see the potential in “throw away” material.

**Art Title: “Resonance”**

**Date Created:** 2024

**Description:** The pipe is cut open to reveal a bell nestled inside. The deep tone that resonates the air invites everyone to pause and listen.

**Medium:** The tippy top is from a motor housing that holds the oxygen tank bell. The pipe is from an hold horse gate. The base is to be determined along with a powder coat color for the bell. Or leave the bell shinny and have the outside powder coated. The bell will be bolted from the top, everything else will be fully welded.

**Dimensions:** 101 inches (8.4 feet) by 13 inches

**Weight:** 350 pounds

**Listed Price (City takes 30% commission):** \$8,800

**Artist Website:** [www.fairyforge.com](http://www.fairyforge.com)

# Artist H – Charles Fitzgerald

## “Sky Protector”

---

### Artist Statement:

I enjoy designing and creating art (mainly sculpture) that will be viewed by the public. I have a bachelor of fine arts degree and have created and installed art throughout the northwest for 25 years. After working as an illustrator at Boeing for 13 years, I taught high school art for 23 years. I have been creating large scale sculpture and public art for 30 years. I have concentrated on aluminum for about 10 years.

My work demonstrates a diversified approach in both materials and concepts. I create sculptures using wood, synthetic concrete and stainless steel. I have also completed several commissions where a specific theme was required. I often observe small forms like insects, birds or berries and transform them into large scale sculptures.

I have been feeding, studying and creating hummingbirds for over 10 years. I am amazed by the fact that they eat their weight daily, they are the only bird that can fly backwards, they migrate thousands of miles, and their wings move several hundred times a second. I have been creating/fabricating them out of aluminum and stainless steel. Sizes range from 10 inches to 50 inches.

### Art Title: “Sky Protector”

**Date Created:** 2024

**Description:** This piece was designed by me on a computer. The vector image was sent to a shop that is able to cut the aluminum with a waterjet process. After the pieces have been cut, I grind them with a 24 grit disk and fabricate them by doing “plug” welds. The welds are done so they can be ground off on the surface therefore are not visible. The 24 grit grinding grit offers a coarse line pattern that reflects light in a unique way. This piece is also extremely vandal resistant. Paint and other markings can be ground off with a 24 grit disk grinder.

**Medium:** cut aluminum that is then welded together

**Dimensions:** 60 inches by 20 inches

**Weight:** 50 pounds

**Listed Price (City takes 30% commission):** \$5,000

**Artist Website:** [www.northwest-designs.com](http://www.northwest-designs.com)

# Artist I – Diego Harris

## “Steel Sprig”

### Artist Statement:

My name is Diego Harris and I’m an artist living and working in Upper Lake California. My primary focus is on creating larger than life Corten steel sculptures with abstract shapes that almost border on figurative plant and animal themes. My piece for this entry is titled Steel Sprig. Steel Sprig is a very curvaceous but slender Corten steel sculpture with an internal structure of steel rebar. I wanted it to have a very alive feeling to it and also that it would seem to be growing out of the ground like a large tropical plant of some kind. As it appears in the photos I’m submitting, it’s very shiny and new, but over time it will develop a fine red rust patina.

I’ve made about 40 large scale Corten steel sculptures. I’ve made dozens more in mild steel and scrap metals as well as many gates and benches and such. I’ve been welding large sculptures for about 15 years now. I have many sculptures in sculpture shows in several states as well as many on permanent display.

### Art Title: “Steel Sprig”

### Date Created: 2024

**Description:** Large abstract Corten steel sculpture with an internal structure of steel rebar. There are four 3/16 inch thick by 2 inch wide Corten steel loops with 5/8th

inch holes for bolting down the sculpture. They are located at points roughly centered with the sides of the base of the sculpture. They are about 24 inches apart. The sculpture can also be welded down if it’s easier.

**Medium:** 16 gauge Corten steel sheeting and 8 gauge Corten steel plate as well as an internal structure of 3/8th inch steel rebar. I start by constructing an internal structure of steel rebar. I bend the rebar to form the outlines of the sculpture and then weld cross members to add strength. Once I have the structure done I trace out the curves with packing paper and then transfer the shapes to the Corten sheet steel. I cut out the sheet steel with a plasma cutter and then sand all the edges smooth. I bend all the sheets by hand and then clamp them onto the structure of the sculpture before seam welding all the edges. The last thing I do is sand all the welds smooth for safety and aesthetics.

**Dimensions:** 106 inches (8.8 feet) by 48 inches

**Weight:** 150 pounds

**Listed Price (City takes 30% commission):** \$9,000

**Artist Website:** [www.steelsculpturesbydiegotharris.com](http://www.steelsculpturesbydiegotharris.com)

# Artist J – Kyle Ocean

## “Transcend”

---

### Artist Statement:

Kyle Ocean is a sculpture artist residing in Olympia, Washington, whose work is concept-driven and centered around geographical exploration and public involvement. Receiving his BFA from Oregon State University with a focus in Sculpture and Printmaking. His sculptural work utilizes the graphic language of his printmaking and drawing, translating that language into equally expressive three-dimensional form. Much of his work uses scale and surface details, intended to captivate the viewer’s interest from afar. His designs are intended to bring the viewer closer to investigate the complexity of intricate surface details that are revealed through the patina process.

Most of his art work background is in welding and outdoor steel sculptures. He has been welding steel and making outdoor sculptures for 13 years with a long list of installations all over Colorado, Oregon and Washington.

### Art Title: “Transcend”

**Date Created:** 2024

**Description:** This piece is something I have been working out in my head for a couple a years now and is finally in its first official form. The piece stems from the concept of sphere that acts as a portal in a sense, with energy in the form of steel columns bursting through as the sphere opens up. The original concept for this came from a though experience about what energy might look like as it explodes out of a black hole.

As of this very moment it is early November and the piece is still in progress, it will be completed by the end of November 2024. The photos submitted in this application are of the original model. The piece will be 75% completed by the time that your committee views the application.

**Medium:** This piece is welded out of Corten steel, with a custom rustic patina and clear coat.

**Dimensions:** 132 inches (11 feet) by 36 inches

**Weight:** 250 pounds

**Listed Price (City takes 30% commission):** \$12,000

**Artist Website:** [www.kyleocean.com](http://www.kyleocean.com)

# Artist K – Paul Reimer

## “Camp Song”

---

**Artist Statement:**

For centuries, the blacksmith has been a master of utilitarian sculpture. Kings have called on blacksmiths to build structures that have outlasted their royal selves by centuries. Today, the craft of the artist-blacksmith remains entrenched in that respected tradition. When it gets red-hot, iron takes on a malleable quality that, with the right tools and experience, can be formed into a limitless variety of shapes and forms. The artist’s creativity flows easily into the red-hot iron and once it cools, you can rest assured that that piece will remain intact for generations.

I began my career as an artist-blacksmith at the age of 15 and over the past 30 years I’ve worked on numerous large-scale residential, commercial and public art projects. My sculptures are collected by art enthusiasts in many countries around the world.

I take inspiration from a variety of sources; architecture and design, culture, history, relationships and nature. I take pride in being “hands-on” in every phase of the creative process. I design, create and install every piece of art I am commissioned to produce.

**Art Title: “Camp Song”**

**Date Created: 2024**

**Description:** I’ve had the great fortune to live my whole life surrounded by the breathtaking beauty of the Rocky Mountains. I grew up in a small town in British Columbia and I spent my childhood exploring those mountains and discovering the gifts they hold. It has been one of the great joys of my life to raise my own children here and help them to discover and appreciate the natural beauty of the Rockies.

So many of my favorite memories are of camping with my family. All of us out under the stars at night - around the campfire — laughing,

telling stories and just being a part of nature. “Camp Song” is about the wonder and adventure of being out under the stars, gathered around the campfire with family and friends.

**Medium:** Hand-forged iron

**Dimensions:** 120 inches by 24 inches

# Artist L – Paul Reimer

## “Carried by the Breeze”

---

### Artist Statement:

I have 35 years of experience as an artist/blacksmith, and I take pride in using the centuries-old techniques in blacksmithing to create quality hand-forged iron artwork that will last for generations. My sculptures are durable, extremely resistant to weather and vandalism and virtually maintenance-free.

Art can transform a physical location into a connection between people. This connection helps people to identify with each other and helps facilitate community growth. Public art should create a sense of ownership in the viewer. Just as the art in your home helps to make that place meaningful to you, public art can inspire investment in your community. It can help to define “your neighbourhood” and “your city.” Art can lift up a community and energize the spirit of the individuals within it.

When I create a public artwork I want it to be an expression of that community. I want people to see themselves and their community in that artwork - what they were, what they are and what they want for the future. When people see that sculpture they should have a feeling of, “That’s us, that’s who we are.”

### Art Title: “Carried by the Breeze”

**Date Created:** 2024

**Description:** For thousands of years and across innumerable cultures, feathers have represented a connection to the spiritual. They are not only a physical symbol of flight and freedom, but also symbolic of spiritual evolution. Universally, feathers are a positive and uplifting image, bringing to mind freedom, truth, courage, travel, spirituality and more. No matter your age or cultural background, this large-scale, interactive artwork is immediately recognizable as an uplifting symbol of freedom and happiness. It’s welcoming and engaging and invites viewers to get closer and explore the visual details, the finish and the varying textures.

**Medium:** Hand-forged iron

# Artist M – Paul Reimer

## “In Search of Resilience”

---

**Artist Statement:**

(See previous)

**Art Title: “In Search of Resilience”**

**Date Created:** 2024

**Description:** Throughout our lives we search for inspiration, success, enlightenment, perhaps even fame and fortune. As we search, as we meet each challenge, we learn, we grow, and we strive to develop the resilience to thrive. The curling, upward reaching form evokes the idea of a winding path, suggesting that the search for resilience is an ongoing journey, marked by twists and turns. The upward reaching form has an air of unwavering determination to attain our highest ideals.

The textured surface of the iron speaks to the bumps and bruises, both visible and invisible, that we all sustain on life’s journey - a testament to the trials and tribulations of life and reminders of lessons learned and challenges overcome. The sculpture is galvanized with a natural steel patina, making it extremely durable and weather resistant. It will be welded to a sheet metal base that can be bolted to any hard surface.

**Medium:** Hand-forged Iron

**Dimensions:** 120 inches by 24 inches

**Weight:** 150 pounds

**Listed Price (City takes 30% commission):** \$12,000

## “Magnify”

### Artist Statement:

Besides my insatiable desire to design, fabricate, deliver and install art to the public wherever I can, whenever I can, as much as I can

### Art Title: “Magnify”

**Date Created:** 2023

**Description:** This interactive, kinetic sculpture acts as a giant magnifying glass, except sunbeams pour through the colored lens as the viewer swivels the rings into position to catch the light, casting a stained glass reflection on the ground, or anything else it hits.

Made from Plasma cut 1/4” steel plate and a 1/2” thick piece of circular, clear acrylic with designs directly printed on using a large format flatbed printer, this piece is sturdy and meant to be enjoyed outdoors by the general public.

“Magnify” instantly becomes an education tool as it demonstrates the concepts of transparency, light reflection and refraction, even the physics of mobility with it’s rotating top. It immediately draws the viewers attention begging to be touched and handled. A strong addition to any temporary or permanent sculpture collection!

**Medium:** Plasma cut steel welded and painted black, 1/2” Polycarbonate, UV Inks

**Dimensions:** 96x36 inches, 16x16 inches for base

**Weight:** 85 pounds

**Listed Price (City takes 30% commission):**  
\$10,000

**Installation:** Steel plate for base

# “Multi Purpose Assist Droid (MPAD)”

### Artist Statement:

**Art Title:** “Multi Purpose Assist Droid (M.P.A.D.)”

**Date Created:** 2024

**Description:** In a future where technological advancements have seamlessly integrated robots into every facet of human life, the multi-purpose assist droid stands out as a revolutionary tool with endless capacity. Powered by cutting-edge solar skin and electromagnetic levitation technology, this droid is designed for unparalleled versatility and efficiency.

On distant planets, it plays a crucial role in constructing habitats, utilizing its robust adaptability to withstand harsh environments. Moreover, its ability to collect and analyze off-world samples makes it invaluable for scientific exploration and research, paving the way for new discoveries and advancements. The multi-purpose assist droid is not just a tool, but a transformative force, reshaping the possibilities of human achievement across multiple domains.

**Medium:** Upcycled Hard Plastic Industrial Marine Buoy, plus plasma-cut steel

**Dimensions:** Base is 16x16 inches; height around 5 feet      **Weight:** 85 pounds

**Listed Price (City takes 30% commission):** \$13,000

## Artist Q – Kirk Seese

### “Ramis Arbor Sculptura, aka Tree Branches”

#### Artist Statement:

Since 2019, after I began competing nationwide, I have been selected for, designed, fabricated, delivered and installed public sculpture in 36 states so far, with budgets ranging from \$400 - \$250,000, and everything in between. I enjoy experimenting with new materials, learning about best practices from other, more experienced artists, and challenging myself with even larger and more complex projects.

I have been using these media for 10 years. I started using the CNC machine to cut intricate shapes from MDO board & polycarbonate in 2015 as LeadDesigner for ClimbZone, a themed climbing gym company.

**Art Title:** “Ramis Arbor Sculptura, aka Tree Branches”

**Date Created:** 2023

**Description:** Tree Branches is another adaptation of the Feather design, although more complex as I stray from the singular post and add “branches” sprouting from a main “trunk”. In keeping with the “Feather” panel style, I use geometric shapes lined in black, with fields of swirling and fading colors inside. These colors repeat themselves in a kaleidoscope fashion, emanating from the center of each panel, and are symmetrical. They have a strong tie-dye or wax batik look. A very organic and psychedelic feel, warm and inviting.

So far, there are several versions of Tree Branches “out in the wild”, in Alamosa, CO, Georgetown, TX, St. Charles, IL, St. Joseph, MO, Lyons, CO and Dexter, MI

**Medium:** Welded tubular steel, Clear Polycarbonate panels, CNC cut and printed using non-fading UV inks, as well as Medium Density Overlay Board, (MDO), CNC cut, primed, route, sanded & painted. Paint and UV ink, as well as a clear acrylic sealant

**Dimensions:** 96 inches (8 feet) by 60 inches

**Weight:** 105 pounds

**Listed Price (City takes 30% commission):** \$10,000

**Artist Website:** [www.alienartifactstudios.com](http://www.alienartifactstudios.com)

# Artist R – Mark Twain Stevenson

## “The Old Rooster”

### Artist Statement:

I was first inspired to make sculptures in metal when working in an enormous industrial iron foundry in Wisconsin. I learned the art of bronze casting working for a decade at the Riverdog Fine Art foundry near my home and studio in Port Townsend Washington, casting works for numerous prominent artists as well as my own art. We made 2 copies of a ten foot Lief Erickson for Trondheim, Norway and a site in Greenland, large whale backs for Seattle Center, a new casting of an historical fountain for Port Townsend. I did that one again for Redlands, CA and just recently finished a third copy for the Hotel del Coronado in San Diego. I was employed by the Walla Walla Foundry as part of a large crew making art works for some very well known artists, all the while continuing to make my own sculptures.

I’ve had ten years employment casting bronze at Riverdog Fine Arts, 2 more years at Walla Walla Foundry, Molding, making waxes and welding and chasing bronzes for clients and myself, plus fabricating in steel and stainless steel 34 years.

### Art Title: “The Old Rooster”

**Date Created:** 2001

**Description:** “The Old Rooster” reminds me of an art work my father hung in our home of Georges Roualt’s “The Old King.” The King/Rooster is worn and tired from his duties but still in charge. It is in its way a tribute to my father (don’t get me wrong- papa was faithful to my mother). I sculpted this work out of plaster over a steel armature, using a cheese grater for the surface texture, before molding and casting it into bronze. It is well traveled having been in numerous juried one and two year outdoor exhibitions, chosen by Bruce Guenther, curator of the Portland Art Museum, for a show in Colorado Springs.

**Medium:** Sculpted in plaster over a steel armature. Then molded in parts, these cast by the lost wax method into bronze and the parts welded together. Finally a patina is applied using heat and chemicals.

**Dimensions:** 48 inches high by 60 inches long

**Weight:** 200 pounds

Kids on The Old Rooster by Mark Stevenson  
Bronze 4’h x 5’x 26” on steel “rail” 2’h x 6’  
bronze weight approx. 250 lbs.

# Artist S – Jud Turner

## “Titus – Dungeness Crab”

### Artist Statement:

I am a professional sculptor of 30 years, with a history of designing, fabricating and installing public art, that is loved by people who live, work and travel those areas. My artwork is in public and private collections around the world. The subject matter of my sculpture is stylized realism. I’m a skilled fabricator with decades of experience welding steel and building sculptures of all sizes.

Approaching a project, I begin with research to inform the design, consult local history, geography, and cultural identities of the region. I travel to the area when selected as a finalist to meet people and get an experiential feeling for what subject matter and style best suits the project. This is invaluable in designing permanent public art that locals feel good about having in their community for decades. Community input helps to create the best public sculpture.

I create art works that unite people in appreciation of experience that emphasizes the things we share in common. Public art creates identity of the place it is sited, and enriches daily experience. It’s important to me to create art that connects to a diverse spectrum of people, is accessible and helps people feel inspired.

I know that people in Florence will get great enjoyment from seeing Titus the Dungeness crab installed as part of Art Exposed. My previous participation “Loki the Sockeye Salmon” was very well received and I am happy to present this recent, coastal themed work for consideration.

### Art Title: “Titus — Dungeness Crab”

**Date Created:** 2022

**Description:** Welded steel and recycled chrome sculpture of a large Dungeness crab.

**Medium:** Welded steel, recycled chrome, found objects including motorcycle parts. This piece is chrome and will be clear coated with transparent powder coating to prevent weathering during the time that it would be on display.

**Dimensions:** 48 inches by 72 inches (4x6 feet) on a steel mounting post

**Weight:** 200 pounds

**Listed Price (City takes 30% commission):** \$9,000

# Artist T – Josh Voynick

## “Frequency”

---

### Artist Statement:

I have a 20 year history being a metal fabricator and abstract artist. I make abstract art to use my artistic voice to bring awareness and change to social and environmental issues. And to be honest, it is a great stress reliever to pound a piece of metal into another shape after heating it.

My artwork represents my view of the world that is driven by love and gratitude. It is my desire to share those feelings and inspire change. While I understand that there is injustice and inequality, I am committed to seeking improvement and being a positive force for change.

I am still constantly inspired by nature and wildlife. I am also inspired by my mentors, that taught me through their positive attitudes and challenged me to give back. I was initially inspired by the works of: Ansel Adams, Dali and Escher. Living in the mountains now, it has become a never ending source of ideas and pathways for me to follow.

I started my metal journey by learning to fabricate. Once I learned to forge metal, it soon became clear that there were few if any limitations to creating an abstract art form. I tend to work with simple shapes and forms, and use the finishing process to add depth to my work.

My art means forming connections with people on a deeper level. There is no greater feeling watching someone’s face turn to a smile when they “get it”. This is what keeps me going.

**Art Title:** “Frequency”

**Date Created:** 2024

**Description:** This abstract, kinetic sculpture is meant to evoke the feeling that we are all pieces of vibrational energy.

**Medium:** This piece was forged and welded out of 26 pieces of 1/4” x 4” mild steel. It was then sandblasted and powder coated.

**Dimensions:** 85 inches (7+ feet) by 24 inches

**Weight:** 120 pounds

**Listed Price (City takes 30% commission):** \$3,500

# Artist U – Caleb & Deena White

## “Multi-Faceted Planet”

### Artist Statement:

Owl’s Nest Studio is a collaboration between a husband and wife team who, together, in their art, explore themes of community, human connection and isolation, and our existence within a sense of place. Their preferred medium incorporates metal to achieve a balance of sharp textures and soft colors in their pieces. The artists live with their dog in the Pacific Northwest.

They have over twenty-five years of experience welding, fabricating, machining, designing and installing significant projects from conception to completion. They use metal, including steel, stainless steel, aluminum, bronze and brass, due to the physical properties, reaction to the elements, colors, weights and finishes available. They design and create artwork using CAD and manual and CNC machining techniques to obtain precision angles. They enjoy collaborating with and refining creations with city officials, community members, fellow artists, engineers, and designers.

### Art Title: “Multi-Faceted Planet”

**Date Created:** 2024

**Description:** “Multi-Faceted Planet” explores the concept of interconnection. Using stacked plates to form a larger shape, the varying segments represent how we exist in the world around us - not only at the individual level, but how, together, we form a larger whole. Each individual plate exists isolated in space until joined together with others to obtain transformation and movement.

**Medium:** Stainless steel, glass

**Dimensions:** 34 inches by 16 inches

**Weight:** 62 pounds

**Listed Price (City takes 30% commission):** \$5,500

# Artist V – Lucy Ruth Wright Rivers

## “Box 1 Rose”

### Artist Statement:

This piece is from a series that was inspired by the sheer quantity of cardboard boxes that accumulate as a result of online purchasing. I used boxes to create my forms, the boxes become not only a conceptual, but also an integral part of the work.

I like to work with found color and discarded materials, giving them new life. I am drawn to the embedded narratives that materials can bring forth from their previous uses. Formally, I am attracted to the play of light and color over the surface, the shapeshifting quality achieved by mixing translucent and opaque surface materials. The surface and colors change and shift throughout the day as the daylight and the point of one’s view changes.

I’ve been working with these materials since 1999, first creating mosaics on pre-existing concrete forms with students at schools. I’ve been building forms and covering them with mosaic since 2002.

### Art Title: “Box 1 Roses”

**Date Created:** 2024

**Description:** Cement sculpture, covered in mosaic of reclaimed fragments of found and reclaimed ceramics and glass.

**Medium:** Sculptural form created by forming chicken wire over reclaimed cardboard, then coated with layers of stucco and a mosaic of glass and ceramic bits. materials: chicken wire, fibered stucco, acrylic modified cementitious mortar, found and reclaimed ceramic and glass bits, acrylic modified grout.

**Dimensions:** 30.5 inches by 14 inches

**Weight:** 80 pounds

**Listed Price (City takes 30% commission):** \$2,900

## “Merle”

---

### Artist Statement:

This piece is from a series that is somewhat figurative but also inspired by the shapes and forms of growing plants. I am inspired by the incredible variety of colors and textures that exist in the natural world. While this series is inspired by natural forms, they are also somewhat alien, related to earthly forms and figures, but not quite the same.

I like to work with found color and discarded materials, giving them new life. I am drawn to the embedded narratives that materials can bring forth from their previous uses. Formally, I am attracted to the play of light and color over the surface, the shapeshifting quality achieved by mixing translucent and opaque surface materials. The surface and colors change and shift throughout the day as the daylight and the point of one’s view changes.

I’ve been working with these materials since 1999, first creating mosaics on pre-existing concrete forms with students at schools. I’ve been building forms and covering them with mosaic since 2002.

### Art Title: “Merle”

**Date Created:** 2020

**Description:** Cement sculpture inspired by plant and sea life forms, covered in mosaic of reclaimed fragments of found and reclaimed ceramics and glass.

**Medium:** Sculptural form created by forming chicken wire over plastic detritus, then coated with layers of stucco and a mosaic of glass and ceramic bits. materials: rebar, chicken wire, fibered stucco, acrylic modified cementitious mortar, found and reclaimed ceramic and glass bits, acrylic modified grout.

**Dimensions:** 82 inches (almost 7 feet) by 26 inches

**Weight:** 200 pounds

**Listed Price (City takes 30% commission):** \$11,050

## “Tendrils 2”

---

### Artist Statement:

This piece is from a series that is inspired by the shapes and forms of growing plants. I am inspired by the incredible variety of colors and textures that exist in the natural world. While the pieces in this series are inspired by and reference natural forms, they are also somewhat alien, related to earthly forms, but not quite the same. I like to work with found color and discarded materials, giving them new life. I am drawn to the embedded narratives that materials can bring forth from their previous uses. Formally, I am attracted to the play of light and color over the surface, the shapeshifting quality achieved by mixing reflective, translucent, and opaque surface materials. The surface and colors change and shift throughout the day as the daylight and the point of one’s view changes.

I’ve been working with these materials since 1999, first creating mosaics on pre-existing concrete forms with students at schools. I’ve been building forms and covering them with mosaic since 2002.

### Art Title: “Tendrils 2”

**Date Created:** 2024

**Description:** Cement sculpture inspired by plant forms, covered in mosaic of reclaimed fragments of glass and ceramics.

**Medium:** Sculptural form created by forming chicken wire and stucco lath over rebar and plastic detritus, then coated with layers of stucco and a mosaic of glass and ceramic bits. materials: rebar, chicken wire, stucco lath, fibered stucco, acrylic modified cementitious mortar, found and reclaimed ceramic and glass bits, acrylic modified grout.

**Dimensions:** 77 inches by 11 inches

**Weight:** 80 pounds

**Listed Price (City takes 30% commission):** \$3,700

# Artist Y – MacRae Wylde

## “Inside Out 9”

### Artist Statement:

The phrase “inside out” takes me to my childhood, making sure my sweater was on correctly, and finding socks with the fuzzy side in. It is the idea that what is on the inside defines the outside. Negative space as an interior form that describes the whole. Materials that are visually soft surrounded by rigid structure. Interior structure that is both visible and defining.

MacRae Wylde is a metal sculptor from Hood River, OR, with public installations throughout the country. He is the winner of numerous sculpture show awards. He takes on many different topics, ranging from fun to the environment to truth and perspective.

He has been building steel sculpture for 40 years and has worked with metal in different capacities including custom automotive, where he made convertibles out of exotic sports cars, marine stainless hardware, and architectural elements for houses.

### Art Title: “Inside Out 9”

**Date Created:** 2019

**Description:** “Inside Out 9” is a Welded Aluminum form supported by a steel structure. The details of how the piece was put together and its interior support are exposed and visible. The openings and spaces created within the piece are as important as the construction materials.

**Medium:** Steel And Aluminum **Weight:** 100 pounds

**Dimensions:** 64 inches (5.3 feet) by 44 inches

**Listed Price (City takes 30% commission):** \$6,500

# Art Exposed Old Town 2025-2027 Evaluation Rubric

	Excellent/Very Good	Good	Okay/Fine	Needs Work
	6-7	5-4	3-2	1
<b>VISUAL IMPACT</b> (overall quality)	The unique organization of art elements, content, & execution create a striking & memorable work. If selected, this project has the power to “wow” the viewer.	The organization of art elements, content, and execution create cohesive work. The work has lasting impact on the viewer.	The organization of art elements, content, and execution are addressed in the work. The work holds the viewer’s attention.	The organization of art elements, content, & execution is incompletely addressed in the work. There is little or no impact on the viewer.
<b>INTERPRETATION &amp; CREATIVITY</b> (completeness/effort)	The design shows unique and creative interpretation of the project and was continued until it was as complete as possible. Effort was far beyond that required, with great attention to details.	The design shows clear understanding of the requirements and the artist’s ability to think “outside the box.” With more effort, the application might have been outstanding.	The design shows some creativity and adequate interpretation of the requirements. However, the work appears unfinished.	The design requirements are fulfilled, but there is no evidence of original thought or interpretation. Application is incomplete or lacks attention to details.
<b>COMPOSITION/ DESIGN</b> (organization)	Shows and effectively utilizes knowledge of the elements and principles of design. The design effectively filled the entire space.	Shows an awareness of the elements and principles of design, using one or two elements and principles.	The application was completed, yet work lacks conscious planning and little evidence that an overall composition was thought through. The design partly filled the space.	The artist showed little evidence of any understanding of the elements and principles of art; no evidence of planning: The installation space is somewhat used.
<b>CRAFTMANSHIP</b> (skill with mediums and overall neatness)	Demonstrates a mastery of skill and a clear understanding and application of specific medium qualities. The design is beautiful and complete.	Demonstrates skill and some understanding of specific medium qualities. The design is pleasing and partially complete.	Application demonstrates partial skill and understanding of specific medium qualities. The design is fair.	Application lacks understanding of specific medium qualities. The design is a bit careless in creation of the work.
<b>CRITERIA</b>	All criteria of assignment have been met. Artist demonstrates the best example of following directions for assignment.	Most of the required criteria have been followed.	Some of the criteria have been met.	Only one criterion has been met.
